CORNELI SEED COMPANY, 101 CHOUTEAU AVE., ST. LOUIS 2, MO.

FEB. 28, 1950

#### SPECIAL NOTICE!

For GARDEN SEED PRICES write for our SPECIAL OUOTATIONS

## SEED OATS!

#### **Recommended Varieties:**

### TALL OATS for Medium to Low Fertility Soils —

- ANDREWS CERTIFIED Similar to Columbia in maturity and height but have stronger straw. Highest yielding out tested in Mo. for an average of 22 tests. Has wide adaptability and should replace Columbias in all areas due to its high yields, stronger straw and much greater resistance to various diseases. We feel it will definitely pay to sow Certified Andrews in spite of the price difference.
- 2. COLUMBIAS The old standby for medium to low fertility soils. Early maturity and high in test weight; however, it is susceptible to most out diseases and probably will be replaced in popularity by Andrews and other resistant outs in the next few years.

#### SHORT-STRAW OATS for Fertile Soils —

- 1. MINDOS Early About 5 days to week earlier than Clintons. Straw is shorter than Clinton and not as stiff.
- 2. CLINTON Very popular, short-strawed yellow out for fertile or highly fertilized soils.

## SOY BEANS!

#### **Recommended Varieties:**

#### OIL BEANS -

- WABASH CERTIFIED The newest and probably the best oil bean on the market for the area of Kansas, Missouri, and Southern half of Illinois and Indiana. Excellent bean for combining — very little loss. Same maturity as Chief — about 9 days later than Lincoln. Should replace most varieties except Chief on thin land and Lincoln for early maturity.
- 2. CHIEF Adapted to same latitude as Wabash and is a better bean than Wabash on thin soils only.
- 3. LINCOLN Outstanding, early maturing soy bean very high yielding very high in oil content.

#### HAY BEANS -

- 1. VIRGINIA BROWN BEANS in very short supply order early.
- 2. BLACK WILSONS very good hay bean order early if you need these.
- 3. COWPEAS mixed in very short supply.
